ABOUT

What drives me in this field is the same thing that got me into this field: the feeling you get when something works. This sense of accomplishment is something I want to bring to a team, so as to spread it and build upon it.

Here you will find some of my projects that showcase my skills.

SKILLS

- JAVASCRIPT ES6
- HTML5
- CSS3/SCSS

OTHER RELEVENT SKILLS

- GIT/GITHUB
- BOOTSTRAP 4
- PHOTOSHOP

PROJECTS

BestConnect

https://jolly-poitras-00d5ec.netlify.app/

A brochure website for a mock ISP company. This application is compiled using Sass and utilizes Javascript for navigation, animation, and form validation.

The Modern Age

https://compassionate-mcnulty-6e3e71.netlify.app/

An ecommerce website utilizing Vanilla Javascript for the shopping cart. My approach for the design was to use as little CSS as possible to showcase my skills with Bootstrap 4.

SNAKEGAME.

https://eager-archimedes-956782.netlify.app/

Essentially a clone of the popular Snake game, this app uses Javascript for its logic. The logo is original and was designed using Photoshop.

weatherUP

https://eager-mayer-39308c.netlify.app/

A weather app using the OpenWeather API and Javascript. This web app has dynamic icons and background color based on the weather and time of day.

Portfolio Website

https://reaganclayton.com/

My personal website utilizes Javascript for navigation on a dark themed design with a blue accent and is compiled using Sass.

EDUCATION

Louisiana Tech University
Certificate of Information Technology

Computer programming and data structures, variables and data types, selection and iteration, object creation, collections framework, programming constructs, and code testing.
